

HUGH TURES

Identity and Endpoint Engineer

Capital Region, NY | 928-607-6983 | hughtures@gmail.com | linkedin.com/in/hughtures | hughtures.github.io

SUMMARY

IT professional with 7+ years of experience, including nearly four years administering Microsoft Entra ID, Microsoft 365, and cross-platform endpoint management for a multi-property enterprise of 800+ users. Enforced Conditional Access and organization-wide MFA, automated the Active Directory identity lifecycle with PowerShell across 300 to 500 account changes a year, and held roughly 500 devices to one compliance standard across three MDM platforms. CompTIA A+ and Security+ certified, Network+ in progress. Open to remote or relocation.

TECHNICAL SKILLS

Identity and Access: Microsoft Entra ID (Azure AD), Conditional Access, MFA enforcement, Active Directory, Group Policy (GPO), hybrid identity, identity lifecycle (joiners, movers, leavers), access reviews, least privilege, single sign-on access assignment through Entra ID and AD security groups, Beyond Identity passwordless and Zero Trust

Endpoint and Cross-Platform MDM: Microsoft Intune (MDM/MAM, compliance policies, configuration profiles, app deployment), Jamf (macOS, iOS), Soti MobiControl (Android), Esper, Deep Freeze, Windows 10/11, endpoint security baselines

Microsoft 365 and Cloud: Tenant administration, Exchange Online, SharePoint Online, OneDrive, Teams, mailbox management, licensing and subscription management, Azure resource administration

Automation and Scripting: PowerShell for AD user lifecycle, onboarding and offboarding, group audits, access reviews, and Exchange Online configuration

Security: MFA and Conditional Access policy design, Mimecast email threat protection, security baselines, patch and vulnerability management, security assessments, SOP development and security training

Networking and Infrastructure: Fortinet firewalls and VPN, network segmentation, DNS, DHCP, multi-site deployments, Windows Server maintenance and patching in a support role

ITSM: Jira and KACE for incident, service request, and change management, software deployment, system inventory

PROFESSIONAL EXPERIENCE

IT Support Specialist (Systems Administration and Endpoint Engineering)

Aspen Hospitality | Aspen, CO | October 2022 to July 2026

- Administered Microsoft Entra ID (Azure AD) for 800+ users across multiple hotel properties, enforcing Conditional Access and organization-wide MFA for remote and on-site staff.
- Cut manual new-hire setup from 30 to 45 minutes to roughly half that by automating the Active Directory user lifecycle and Exchange Online configuration with PowerShell, across 300 to 500 account changes a year.
- Held roughly 500 managed devices to one compliance standard across three MDM platforms at once: Intune compliance policies, configuration profiles, and app packages for Windows, Jamf for macOS and iOS, and Soti MobiControl for Android.
- Owned deployment and administration of Beyond Identity passwordless Zero Trust authentication as primary security-tool administrator, including vendor management.
- Managed Active Directory accounts, security groups, GPOs, and organizational units on-premises and hybrid, granting application access through Entra ID and AD group membership under least privilege.
- Administered the Microsoft 365 tenant covering Exchange Online, SharePoint Online, OneDrive, and Teams, plus mailbox management, licensing, tenant configuration, and Azure resource administration.
- Led end-to-end technology build-outs for two new 250-room properties, covering Fortinet network hardware, DNS and DHCP configuration, device provisioning, application setup, and security baselines from day one.
- Served as escalation point and primary vendor contact for a 40+ application portfolio across hospitality, payments, finance, and workforce, owning access provisioning, integrations, upgrades, and incidents in Jira and KACE.
- Administered Mimecast email threat protection, Salto physical access control, and Verkada IP cameras, and authored SOPs and security-awareness training adopted across all properties.

IT Technician and Security Consultant

Self-Employed | Flagstaff, AZ | January 2019 to October 2022

- Delivered security assessments and prioritized remediation plans for 15+ small-business clients, identifying misconfigured permissions, weak credential policies, and unpatched systems.
- Remediated MFA gaps across client environments, taking each from no enforcement to full coverage, and deployed firewalls, VPN, secure remote access, and network segmentation.
- Executed cloud migrations and security hardening, and built patch schedules, health checks, and maintenance routines that became ongoing client baselines.
